Professional Summary

Aspiring Software Developer pursuing an MCA in Generative AI with hands-on experience in Python, MERN Stack, Flask, and AI-powered web applications. Passionate about building scalable software solutions and continuously learning emerging technologies.

Education

Master of Computer Applications (Generative AI) **CGPA: 9.17**
SRM Institute of Science and Technology, Trichy

Bachelor of Computer Applications **CGPA: 6.91**
SRM Trichy Arts and Science College, Trichy

Internships

Python Development Intern **Elysium Academy**

- Developed Python applications and strengthened problem-solving skills.
- Worked with OOP, file handling, modules, and basic database concepts.

Web Development Intern **Codebind Technology**

- Developed responsive websites using HTML, CSS, and JavaScript.
- Designed user-friendly web interfaces.

MERN Stack Intern **DP Codes**

- Built full-stack applications using MongoDB, Express.js, React.js, and Node.js.
- Developed REST APIs and integrated frontend with backend.

Projects

AI Resume Analyzer & ATS Checker *Python, Flask, NLP, SQLite*

- Developed a web application to analyze resumes and evaluate them against ATS-oriented criteria.
- Implemented PDF/DOCX parsing, skill extraction, education and experience detection, ATS scoring, and resume improvement suggestions.
- Implemented authentication with registration, login, sessions, and password-reset OTP functionality.

AI E-Commerce Chatbot *Python, AI, REST APIs*

- Developed an AI chatbot for answering customer product queries and assisting users with e-commerce interactions.
- Applied Python backend development and conversational AI concepts to generate contextual responses.

Mini E-Commerce System *React, Flask, Oracle Database*

- Developed a shopping application with product browsing, cart, user, and order-related functionality.
- Built REST APIs using Flask and integrated the React frontend with an Oracle database.

RAG-Based Document Intelligence System *Python, Flask, FAISS, LLM*

- Developed a document question-answering system that processes PDF/DOCX files and divides extracted content into meaningful chunks.
- Implemented embeddings and FAISS vector search to retrieve semantically relevant document content.
- Generated LLM responses grounded in retrieved context with source citations.

Technical Skills

Languages: Python, JavaScript, HTML, CSS

Frameworks: React.js, Flask, Express.js, Node.js

Databases: MongoDB, MySQL, SQLite, Oracle Database

AI / GenAI: RAG, LLMs, Embeddings, Prompt Engineering, NLP

Tools: Git, GitHub, VS Code

Concepts: Data Structures, OOP, DBMS, REST APIs, Authentication, Session Management, Git Version Control

Soft Skills

• Problem Solving • Communication • Teamwork • Adaptability • Time Management • Quick Learner
